

# Waratah Cupboards

Waratah cupboards meet the future challenges of modern office design and storage requirements, reducing wasted space and file retrieval time

## Flexibility

Brownbuilt Waratah tambour door cupboards combine the access of open shelving with the security and privacy of hinged door cupboards. Waratah cupboards are available in a range of sizes ranging from "Under-desk" units to 1980mm high units, in three widths to suit individual layouts. Waratah cupboards offer 25mm vertical shelf adjustment to maximise internal space utilisation and a wide selection of versatile filing accessories is available to meet individual needs.

## More Space Without Waste

Waratah's tambour door system recedes fully into the cupboard carcass allowing installation where conventional hinged door cupboards would impede personnel movement. The tambour doors are fully concealed by internal metal uprights ensuring full cupboard access when open.

# Technical Specifications

## External Dimensions

- Heights: Under-desk: 680mm  
Counter-high: 1020mm  
3/4 high: 1330mm  
Full height: 1980mm

- Welded carcass sub-assemblies
- Key locking
- Metal internal uprights
- 25mm vertical shelf adjustment
- Double-walled PVC slat system with internal webbing
- Injection-moulded door track
- Wide range of filing accessories

## Finish

- Powder coat
- 8 standard colours

### Strength & Stability

Waratah cupboards are manufactured with a high quality metal construction for strength and durability. Welded internal door-frame assembly and bottom support channel, with bolted internal uprights, provide superior carcass rigidity.

### Smooth Operation

Double-walled PVC door slat construction features internal webbing to ensure door stability, and prevent jamming. Waratah doors glide easily along durable, injection-moulded tracks with a cambered track profile.

### Key-Locking Security

A central key-locking system operates in an aluminium reinforced tambour slat to provide security for stored documents and files. The special PVC formulation of Waratah tambour slats is fire retardant for additional protection.
