OUR HERITAGE

Brownbuilt has been an industry pioneer since 1885 and has been responsible for many technical innovations in storage systems during that time. Brownbuilt's position as one of Australia's leading suppliers of storage systems for both office and industrial applications reflects a philosophy of continued investment in modern technology and use of the highest quality components.

Our customers have the assurance of knowing that they are dealing with a company whose track record over the past century proves the importance given to quality - both in the products we make and the service offered to our customers.

MISSION STATEMENT

"To be recognised as a pre-eminent internationally competitive supplier of quality products to the office and industrial storage markets in our region. To be acknowledged for our commitment to customer service, long term relationships of trust and equity and for the development of our employees for the betterment of both the Company and its employees."

WARRANTY

Brownbuilt Office Products are warranted to be free from defects in materials and workmanship for five (5) years from the date of purchase. If any defect in material or workmanship should occur within the Warranty Period, Brownbuilt Pty Limited will repair or replace the unit. This warranty does not apply if the defect occurs as a result of:

- the unit being used for a purpose other than that for which it was intended
- misuse, neglect or accidental damage
- scratches, dents or blemishes which occurred after the unit's date of delivery

Units returned to Brownbuilt Pty Limited premises will be repaired subject to the aforementioned.

5 YEAR
WARRANTY

QUALITY AND SUPPORT

All Brownbuilt products are supported by a quality system based on Australian Standard AS/NZS ISO 9002:1994. When you deal with Brownbuilt not only do you benefit from our extensive design and consultancy resources gained from over 100 years of experience, but you are also supported by a comprehensive national installation and service network.

ANTI-TILT FILING CABINET

The latest in a series of filing cabinets which lead the Australian market in both engineering and design.

Brownbuilt's Anti-tilt filing cabinet features a sturdy welded support frame, fully-welded top and full-depth zinc base plate for strength and stability. A full height painted drawer body design ensures secure file storage with the option of a drawer file rack divider. Drawers can be completely removed and replaced for relocation using an innovative lever-disconnect mechanism. The contemporary exterior design features a high quality contoured alloy drawer handle for ease of use and individual style.

SMOOTH OPERATOR

A modern, 2-stage ball bearing runner system gives smoother, quieter drawer operation, with complete access for file retrieval. Testing with a 30kg load for over 50,000 drawer cycles ensures that this filing cabinet can stand up to the toughest treatment.

SAFE AND SOUND

The runner system incorporates a drawer lock-out mechanism as standard, which stops tilting by preventing more than one drawer being open at the same time. Runner buffers reduce metal-to-metal contact and prevent drawers drifting open when fully closed for additional operator safety.

LEGATO FILING CABINET

Legato® is a fully featured cabinet that has been designed to provide practical and reliable storage to make the most of your office space.

Legato cabinets feature a 2-stage ball bearing runner design that operates smoothly even when fully loaded. Drawers can be completely extended for access to all files, and can easily be removed if required for relocation.

A full height zincseal drawer body design fully supports files and prevents documents from falling into the cabinet. PVC strips fitted to the drawer sides allow ease of file movement.

AESTHETICS

Legato drawers feature a dished finger grip section with a full width handle and card holder for ease of operation and file location. A fully seam welded top and slimline carcass construction without exposed assembly fittings ensure a high quality exterior finish.

STRENGTH

The Legato's ball bearing runner assembly has been load tested in excess of 50,000 cycles with a 30kg load for maximum durability. Legato is assembled using an integrated welded cabinet frame with support channels under each drawer to ensure cabinet carcass strength.

MOBILE PEDESTAL

LEGAL DRAWER

FILE DRAWER

Combining the strength of full metal construction with an aesthetic design to enhance any desk or workstation.

Brownbuilt Mobile Pedestals have been specifically designed for installation under any desk or workstation system, with unique external dimensions, side-mounted locks and low profile castors.

STRENGTH

Brownbuilt mobile pedestals feature a fully welded top and base frame assembly to provide superior strength and stability for long term service. Brownbuilt's metal drawer construction incorporates full height sides and backs to ensure durability and protect contents. File drawers offer the ease, accessibility and capacity of standard front to back foolscap file storage. Drawers glide smoothly on strong two piece runners and can be removed to assist with relocation.

AESTHETICS

Brownbuilt mobile pedestals can be easily integrated into any office environment with a range of drawer configurations to suit individual applications, attractive alloy handle design, a premium quality metal construction and a wide selection of standard powder coat finishes.

LATERAL CABINET

These multi-functional storage units suit personal or communal file access and provide additional work surfaces or work area partitions.

SMOOTH OPERATOR

A progressive ball bearing runner system extends smoothly even when fully loaded to allow complete access to each drawer. Buffers in the runners reduce metal to metal contact for quieter operation and longer drawer life. Brownbuilt's Lateral filing cabinets have been designed for optimal load carrying capability with welded internal cabinet and base frame assemblies. Drawer bodies are rigid two-piece constructions, with full height sides and backs to prevent file loss.

FLEXIBLE STORAGE

Brownbuilt Lateral filing cabinets have been designed with dimensions that will suit integration into modern workstation and desking layouts. Drawer hanger rails can be configured to provide the ease and accessibility of standard front-to-rear foolscap file storage or laterally across the full width of the drawer.

SAFE AND SOUND

Brownbuilt Lateral filing cabinets provide superior operator safety, utilising a drawer lock-out mechanism that allows only one drawer to be open at a time. Drawer retention systems within the runner arms prevent drawers from drifting open when fully closed. The base assembly contains adjustable levelling feet to compensate for uneven floor surfaces and prevent tipping.

WARATAH CUPBOARDS

Brownbuilt Waratah tambour door cupboards meet the future challenges of modern office design and storage requirements, reducing wasted space and file retrieval time.

FLEXIBILITY

Waratah cupboards combine the access of open shelving with the security and privacy of hinged door cupboards. Brownbuilt Waratah cupboards are available in a range of sizes, ranging from "Under-desk" units up to 1980mm high units, in three widths to suit individual layouts. Waratah cupboards offer 25mm vertical shelf adjustment to maximise internal space utilisation. A wide selection of versatile filing accessories is available to meet individual storage needs and provide multi-media filing capability.

MORE SPACE WITHOUT WASTE

The Waratah tambour door system recedes fully into the cupboard carcass allowing Waratah to be positioned where conventional hinged door cupboards would impede personnel movement in areas such as narrow aisles, corridors and corners. The tambour doors are fully concealed by internal metal uprights ensuring that the cupboard is fully accessible when open.

STRENGTH AND STABILITY

Waratah cupboards are manufactured with a high quality metal construction for strength and durability. Welded support channels at the top and bottom of the cupboard, with bolted internal uprights, provide superior carcass rigidity for high load capacity storage.

SMOOTH OPERATOR

The double-walled PVC door slat construction features internal webbing to ensure door stability and prevent jamming. The Waratah doors glide easily along durable, injection moulded tracks with a cambered track profile, supporting the top and bottom of the door slats.

KEY-LOCKING SECURITY

A central key-locking system operates in metal reinforced tambour slats to provide security for stored documents and files. The special PVC formulation of the Waratah tambour slats is fire retardant for additional protection and peace of mind.

SLIDING DOOR CUPBOARDS

The simple solution for tough, cost effective and reliable storage in areas where access space is restricted.

Brownbuilt sliding door cupboards have been proven performers in organisations of all sizes providing secure shelf-based storage and low-cost additional work surfaces.

BUILT TO LAST

A durable riveted metal construction with welded shelf support channels means that Brownbuilt sliding door cupboards can withstand a lifetime of use. Metal doors slide easily on nylon wheels and guides in metal tracks and can be locked for security.

MAXIMISE YOUR SPACE

Shelf adjustment in 25mm increments maximises internal storage space with a simple shelf clip mechanism. The C9S model utilises a centre partition and four adjustable shelves so that load capacity is not compromised and to increase internal storage flexibility

SWING DOOR CUPBOARDS

MULTI-MEDIA STORAGE

Brownbuilt Swing Door Cupboards have been developed to carry anything from office stationery to light machinery parts and tools. They can be configured as shelving units, multi-media storage units, wardrobes or as combinations. The contemporary exterior design features high quality contoured alloy door handles for ease of use and individual style.

SAFE AND STRONG

Brownbuilt offers design strength that will stand up to the test of time. Integrated door frames with welded tops, fixed bottom shelves and shelf load capacity of 110kg (UDL) ensure a strong and stable storage unit. Internal storage flexibility is achieved with 25mm vertical shelf adjustment and a simple Magiclip support. A wide range of versatile storage accessories is also available.

SECURE STORAGE

Security is a key design issue with metal reinforced doors, welded internal door hinges and a key-activated 3-point locking system.

COMBINATION WARDROBE UNIT

An adaptable and economical answer to multi-purpose storage.

STEEL LOCKERS

RANGE

The wide range of sizes and configurations make Brownbuilt lockers ideal for diverse personal storage applications including factories, warehouses, hotels, offices, schools, hospitals and sporting clubs.

ADAPTABILITY

Brownbuilt lockers can be grouped into banks for stability or placed back to back to conserve space. Door configurations ranging from single to eight doors and a choice of widths mean that Brownbuilt lockers can be specified to maximise your particular space.

DURABILITY

Brownbuilt's modern locker design includes numerous features that ensure long term durability and operator safety, including:

- rigid carcass construction
- sturdy internal hinges
- welded door support channel
- firmly fixed internal shelves
- slot ventilation design

Brownbuilt manufactures Australia's largest range of metal lockers which combine strength, quality and flexibility.

KEY LOCKING

Locker compartments can be individually key locked.

SLOPING TOP

Optional sloping tops at 30° and 45° for hygiene and clean storage.

HANGING SPACE

Comprises a hat shelf with full width coat rail and sliding coat hooks.

LATCHLOCK WITH PADLOCK FACILITY

Alloy finger grip handle that securely padlocks to the bezel housing.

3-POINT LOCKING MECHANISM

Fitted to full length lockers to secure top, bottom and centre of doors.

HAT SHELF/COAT RAIL/COAT HOOK

Multi-purpose storage. Plastic-coated coat rail and two sliding coat hooks.

PLAN FILES

Safe, efficient storage of diverse oversize materials ranging from plans, maps, charts, photographs, engineering drawings, and artwork through to biological artefacts and geological samples.

Brownbuilt plan files are available in 6 and 10 drawer configurations with a quality riveted external construction and welded internal support channels for high load capacity. Drawers open smoothly with ball bearing carriage wheels operating on steel tracks, and feature a ramp-stop mechanism to prevent drawers drifting open. Contents are protected in welded drawer bodies by a hinged front retainer flap and fixed rear hood. Brownbuilt plan file drawers are fitted with full width aluminium handles to make opening even fully loaded drawers simple. Cabinets are designed with top and bottom nesting domes for safe vertically stacking, and can be ordered with either a welded box stand or raised stand with legs.

CARD CABINETS

Brownbuilt's card cabinet range has been specifically designed to store three of the most common index card sizes in Australia. Available as welded two drawer units, each card cabinet is designed with top and bottom corner nesting domes for safe vertical stacking to make the most of valuable office space. Welded drawers operate smoothly and can be fully opened for ease of access to the whole drawer. Contents are protected and restrained by an adjustable compressor plate, controlled by a ratchet mechanism within a channel in the drawer bottom. Index Card location is assisted by the provision of large label areas in each drawer pull handle.

FILING ACCESSORIES

Advancements in information technology have made office filing more complex, requiring individual storage solutions. Brownbuilt has developed a wide range of filing systems that facilitate tailored filing or records management solutions for personal storage through to centralised communal storage.

OFFICE MAXTOR

Brownbuilt Office Maxtor® Storage units have been specifically developed for high density storage in any office environment. By using a single access aisle Brownbuilt Maxtor units can reduce the floor area required for storage with conventional filing systems by up to 50%. Office storage can be centralised, with reductions in file access and retrieval time, plus improved records management through better organisation. The modular platform base design means that there is no need for floor preparation, whilst an attractive furniture finish compliments any office interior design. A wide range of filing accessories and standard sizes ensure a versatile storage system that can be adapted to suit individual needs and support changing storage requirements. Where storage requirements dictate a customised solution, Brownbuilt can design and manufacture an individual installation to maximise storage capacity.

VERSATRAC

Versatrac® is a fully featured, light-duty, compact mobile storage unit that has been designed to economically maximise storage efficiency by reducing valuable floor space. Versatrac is extremely versatile, with a range of storage cabinet sizes and the choice of transverse (shown right) and longitudinal configurations to suit your individual storage and access requirements. Versatrac utilises a unique low profile aluminium track that can be laid directly onto an existing floor surface without the need for floor preparation. Load wheels with ball bearings run smoothly on a durable steel insert within the track and lateral guide wheels ensure correct mobile alignment.

LIBRARY SHELVING

Brownbuilt Library Shelving is designed to provide efficient and economical freestanding storage and display facilities. Versatile configurations and a wide range of storage accessories ensure layout flexibility and the maximum use of available space. Double-punched uprights allow for independent, adjacent shelf positions, with 20mm vertical height adjustment. A durable bolted frame assembly, utilising welded single or double sided upright construction, forms a stable storage unit. Adjustable feet in each upright compensate for uneven floor surfaces to provide additional operator safety. Brownbuilt library shelving can be easily extended, re-configured or relocated to suit changing storage needs.

COMMERCIAL SHELVING

Brownbuilt Commercial Shelving is the perfect storage solution for any office with restricted space and has been developed to compliment modern efficient records management and storage systems. Commercial Shelving combines the strength and durability of Light Duty RUT shelving with aesthetics and versatility to enhance modern office designs. Metal cover panels ensure a clean, attractive finish to the ends of shelving stacks. Durable thermo-set powder coat finishes are used for all components, which are thicker and more scratch resistant than baked enamel. A wide range of standard contemporary colours allow Commercial Shelving to be integrated into most office environments. An extensive range of filing accessories, compatible with Brownbuilt Cupboards and Office Maxtor Storage Systems, facilitates individual office storage solutions.

POWDER COATING

Brownbuilt Office Products have the advantage of superior quality powder coat finishes in a wide range of contemporary colours:

- Powder coating is a more durable, scratch resistant finish
- Powder coating allows a more consistent colour coating
- Compliant with AS4506 1998 (Service Category 1 & 2)
- Less dust contamination
- Environmentally friendly - no hazardous chemical waste
- Colours shown above represent Brownbuilt's standard colour range
- Non-standard colours are available on request, subject to minimum quantity
- Colours shown are as accurate as printing processes allow
